

COME, COME, YE SAINTS

These words were written as the Mormon pioneers made their historic trek from Illinois to the Salt Lake Valley. The melody was adapted from an English folk song.

<i>Come, come, ye Saints, no toil nor labor fear;</i>	<i>And should we die before our journey's through,</i>
<i>But with joy wend your way.</i>	<i>Happy day! All is well!</i>
<i>Though hard to you this journey may appear,</i>	<i>We then are free from toil and sorrow, too;</i>
<i>Grace shall be as your day.</i>	<i>With the just we shall dwell!</i>
<i>'Tis better far for us to strive</i>	<i>But if our lives are spared again</i>
<i>Our useless cares from us to drive;</i>	<i>To see the Saints their rest obtain,</i>
<i>Do this, and joy your hearts will swell—</i>	<i>Oh, how we'll make this chorus swell—</i>
<i>All is well! All is well!</i>	<i>All is well! All is well!</i>

THE TEMPLE SQUARE ORGANS

The organs at Salt Lake City's historic Temple Square represent four distinct approaches to the art of organ building, supporting a long-standing tradition of fine organ music.

THE SALT LAKE TABERNACLE ORGAN, originally constructed by pioneer organ builder Joseph H. Ridges in the 1860s, has been rebuilt and enlarged through the years, most notably in 1948 by the Æolian-Skinner Organ Company of Boston under the direction of G. Donald Harrison. Its 206 ranks, totaling 11,623 pipes, are organized into eight divisions and are played from a five-manual console. This organ is recognized by many as a quintessential example of the American Classic style of organ building, an eclectic approach championed and brought to its zenith by G. Donald Harrison.

THE ORGAN IN THE CONFERENCE CENTER was built in 2000–2003 by Schoenstein & Co. of San Francisco. This organ of the American Romantic style employs a symphonic tonal approach with the richness and warmth characteristic of English instruments. Although designed primarily to provide colorful and varied accompaniment, the organ also renders the solo repertoire beautifully. A five-manual console controls the 7,708 pipes of its 130 ranks, which are spread across seven divisions.

FOR THE ASSEMBLY HALL ORGAN, builder Robert L. Sipe of Dallas, Texas, created an instrument influenced by German organs of the 17th and 18th centuries. Installed in 1983, this three-manual organ features mechanical key action, four fully encased divisions, clear ensembles voiced on low wind pressure, and a classically inspired tonal palette. The organ contains 65 ranks, totaling 3,489 pipes.

THE ORGAN IN THE CHAPEL OF THE JOSEPH SMITH MEMORIAL BUILDING was built by the French-Canadian firm Casavant Frères in 1993. This instrument is decidedly French in its tonal orientation, yet like all the Temple Square organs, it has the versatility to render a wide range of repertoire. This two-manual organ comprises 2,484 pipes in 45 ranks and four divisions.
